Professional Summary

Senior Full Stack Engineer with 10+ years scaling enterprise architecture (Google, Disney). Currently architecting AI-driven GenUI platforms, leveraging AI agents to increase delivery speed by 300%. As a hands-on player-coach, I design systems, mentor teams, and write production code to successfully ship complete products within 4 weeks.

Work Experience

rPotential (via Globant)

03/2025 - Present

Senior Software Engineer / Tech Lead

- Architected 1 GenUI engine where 2 LLMs (Claude/Gemini) use tool-calling to stream visual components via NDJSON.
- Built a 40+ component React library using atomic design, consumed across apps via an SDUI backend pattern.
- Built a React + Ink Terminal CLI in 3 weeks using AI coding tools, increasing developer efficiency by 40% across 4 platforms.
- Championed AI-augmented development (Claude/Copilot), accelerating delivery by 200% to ship full platforms **within 4 weeks**.
- Player-Coach Lead: Championed AI-augmented SDLC, amplifying architecture and coding to ship complete full-stack AI platforms in weeks, not months.

Google Cloud Studio Innovation (via Globant)

07/2024 - 03/2025

Senior Full Stack Software Engineer

- Designed the Angular UI for 1 AI app within 6 months, improving search efficiency by 50% via Google Generative AI.
- Integrated 2 core AI services (Gemini LLM and Vector AI) to provide intelligent outfit recommendations for users.

Google Agile Modeling Studio (via Globant)

01/2023 - 03/2025

Senior Full Stack Software Engineer

- Developed the complex frontend architecture for 2 internal AI tools (AMS and AIS) using Angular, TypeScript, and NgRx.
- Implemented Active Learning workflows **within 1 year**, increasing model training speed by 40% using thousands of labels.

PCCW Global (via Globant)

06/2022 - 01/2023

Microservices Architect / SME

- Acted as Microservices Architect to decompose a legacy monolith into **10+** scalable microservices using Node.js and NestJS.

Mission Lane (via Globant)

03/2020 - 06/2022

Full Stack Tech Lead

- Served as Full Stack Tech Lead, managing and mentoring a team of **5+** offshore engineers to deliver robust high-availability microservices.

Google Shopping (via Globant)

11/2017 - 03/2020

Frontend Engineer

- Designed the brand-new Shopping List frontend application, scaling to serve millions of daily active Google users.

Wells Fargo (via Globant)

08/2016 - 11/2017

Full Stack Engineer

- Drove a modernization project to bring UX improvements to the Store Vision Platform, impacting **thousands** of store bankers.

The Walt Disney Studios (via Globant)

08/2014 - 08/2016

Senior Full Stack Engineer

- Provided Full Stack development for the O2I suite, securely handling **thousands** of high-security asset transfers globally.

Walt Disney Parks and Resorts Online (via Globant)

10/2011 - 08/2014

Backend Engineer

- Developed scalable RESTful Web Services utilizing Java, Spring, and JPA to serve **millions** of annual Disney park guests.

Education

Information Systems Engineer

Universidad Tecnológica Nacional (UTN FRLP) • Argentina •
03/2004 - 09/2009

Systems Analyst

Universidad Tecnológica Nacional (UTN FRLP) • Argentina •
03/2004 - 09/2008

Certifications

RxJS 7 and Observables: Introduction • 02/2026 - 03/2026

Udemy

AI Leader: Generative AI & Agentic AI for Leaders & Founders •

03/2026 - 03/2026

Udemy

AI Engineer Agentic Track: The Complete Agent & MCP Course •

01/2026 - 02/2026

Udemy

Google Certified Associate Cloud Engineer

Google

Projects

Project Batcave (Multi-Agent AI Ecosystem)

Architecting a multi-agent AI ecosystem using 1 central orchestrator and 2+ agents for intent-based routing.

ThePaddleGames.com

Designed, developed, and launched a full-stack web application currently serving **100+** active users.

Skills

Angular, Generative UI (GenUI), LLM Integration (Claude/Gemini API),
Microservices, Multi-Agent Architecture, React 19, Server-Driven UI (SDUI),
TypeScript

AI & Architecture: Prompt Engineering

Frontend: NgRx, RxJS, Tailwind CSS 4, TanStack Query, Valtio

Backend: Fastify, Java, Kotlin, NestJS, Node.js, REST APIs, Spring Boot

Cloud & DevOps: Azure, CI/CD, Docker, GCP (Google Certified Associate Cloud Engineer), Kubernetes
