LANGUAGES

English (professional) · Spanish (native)

SKILLS

FRONTEND

React, Angular, TypeScript, JavaScript,
RxJS, Next.js, NgRx, Tailwind CSS,
TanStack Query, Valtio, shadcn/ui

AI & ARCHITECTURE

GenUI, SDUI, LLM Integration (Claude /
Gemini), Multi-Agent Systems, Prompt
Engineering, Microservices, System
Design

BACKEND

Node.js, Fastify, NestJS, Kotlin, Java,
Spring Boot, REST APIs

CLOUD & DEVOPS

GCP, Docker, Kubernetes, Terraform,
Azure, CI/CD

EDUCATION

Information Systems Engineer

UTN FRLP · Argentina
2004 – 2009

Systems Analyst

UTN FRLP · Argentina
2004 – 2008

CERTIFICATIONS

Google Certified Associate Cloud
Engineer
Google

AI Engineer Agentic Track: Agent &
MCP
Udemy · 2026

AI Leader: Generative & Agentic AI
Udemy · 2026

RxJS 7 & Observables
Udemy · 2026

PROFESSIONAL SUMMARY

I build AI-first platforms where LLMs compose interfaces in real-time, not as an experiment, but in production. Senior Full Stack Engineer and Tech Lead with 17 years of experience at Google, Disney, and Wells Fargo, now focused on agentic systems, Generative UI, and the engineering culture needed to ship them. Hands-on across the stack: I design the architecture, write the code, and mentor the team.

"Pablo did the work to understand the vision for an innovative enterprise product and deliver on time, in a high-pressure environment. Demonstrating strong leadership, he innovated on the technical side and worked across teams to ensure alignment on how AI-driven agentic pipelines coordinated session threads, data sources, and realtime rendering. I have every confidence that Pablo will bring value to any team he is a part of."

Sandro Pasquali, Applied AI Leader at rPotential

WORK EXPERIENCE

rPotential

03/2025 – Present

Senior Software Engineer / Tech Lead · Globant

- Architected a Generative UI engine where 2 LLMs (Claude & Gemini) use tool-calling to stream visual components via NDJSON, eliminating all static page templates.
- Built a 40+ component React design system (atomic design, SDUI pattern) consumed across all platforms.
- Implemented an LLM-as-Judge eval framework for non-deterministic AI-generated UIs: 3 validation layers (unit, structural, LLM eval) with pass-rate scoring and CI-gated quality gates.
- Delivered a React + Ink Terminal CLI integrating LLMs with Slack, GitHub & Calendar, meaningfully improving developer efficiency across the team.
- Championed an AI-augmented SDLC using Claude and Copilot, compressing delivery timelines and enabling the team to ship complete full-stack features significantly faster than before.

React · TypeScript · Node.js · Fastify · GenUI · SDUI · Claude · Gemini · NDJSON · LLM-as-Judge · Azure

Google Cloud Studio Innovation

07/2024 – 03/2025

Senior Full Stack Software Engineer · Globant

- Designed the Angular UI for a multimodal AI retail platform showcased at NRF 2025, improving search efficiency by 50% via Google Gemini.
- Integrated Gemini LLM + Vertex AI vector embeddings for personalized outfit recommendations; built a conversational agent on DialogFlow CX.

Angular · TypeScript · RxJS · Gemini · Vertex AI · DialogFlow CX · Protocol Buffers

Google Agile Modeling Studio

01/2023 – 03/2025

Senior Full Stack Software Engineer · Globant

- Built the frontend architecture for 2 internal AI tools (AMS & AIS) with Active Learning workflows increasing model training speed by 40%.
- Developed AIS's LLM-powered concept exploration and data mining interfaces used by Google Research teams inside google3.

Angular · TypeScript · NgRx · RxJS · Protocol Buffers · Bazel

PCCW Global

06/2022 – 01/2023

Microservices Architect / SME · Globant

- Designed the target microservices architecture for a BillingPlatform integration across 150+ countries: service boundaries, API contracts, DDD, and communication patterns.

NestJS · TypeScript · Node.js · Microservices · DDD

Mission Lane

03/2020 – 06/2022

Full Stack Tech Lead · Globant

- Led 5+ offshore engineers through a monolith-to-microservices migration on GCP: React frontend + Kotlin backend with Kubernetes, Terraform, and full observability.
- Designed event-driven architecture via GCP Pub/Sub to decouple payment pipelines, and established sprint cadences and ADRs for a distributed fintech team.

React · TypeScript · Kotlin · GCP · Kubernetes · Docker · Terraform · PostgreSQL · Pub/Sub · Prometheus · ELK

● Google Shopping

11/2017 – 03/2020

Frontend Engineer · Globant

- Built the Google Shopping List application inside google3 (Google's internal monorepo), serving millions of daily active users across Search, Assistant, and Google Home.
- Implemented real-time list synchronization across devices using RxJS and gRPC, and built cross-surface components that adapted seamlessly to web, mobile, and voice-first surfaces.
- Engineered to Google's exacting standards for performance, accessibility, and internationalization, working directly with the Google tech lead and UX designers.

Angular · TypeScript · RxJS · gRPC · Protocol Buffers · Bazel

● Wells Fargo

08/2016 – 11/2017

Full Stack Engineer · Globant

- Led the frontend modernization of the Store Vision Platform, migrating from jQuery to Angular, improving the daily workflow of thousands of in-branch bankers nationwide.
- Identified and debugged critical IE memory leaks in the Polymer framework during an intermediate migration phase, contributing findings back to the broader engineering community.

Angular · TypeScript · JavaScript · Polymer · Java · Spring

● The Walt Disney Studios

08/2014 – 08/2016

Production Support → Full Stack Engineer · Globant

- Owned production support for the O2I secure global asset transfer system, diagnosing live issues where downtime could delay theatrical releases worldwide.
- Transitioned into full stack development, building new features in Java and Angular while leveraging deep production knowledge from owning incident response.
- Monitored high-security asset transfer workflows via Splunk dashboards, performing forensic analysis on production traffic for studio and distribution partners.

Java · Spring Boot · Angular · Oracle DB · Splunk · REST APIs

● Walt Disney Parks and Resorts Online

10/2011 – 08/2014

Backend Engineer · Globant

- Developed highly scalable RESTful services (Java, Spring, JPA) powering reservations, ticketing, and in-park kiosk experiences for millions of annual Disney park guests worldwide.
- Built backend services for the reservation and ticketing systems directly powering the guest experience across Disney parks on web, mobile, and in-park surfaces.

Java · Spring · Spring MVC · JPA · Oracle DB · REST APIs

● Earlier Career

2009 – 2011

Senior Developer · Accenture & Globant (Argentina)

- Led development at Accenture on enterprise J2EE projects (Iberdrola, Marsh & McLennan) and at Globant on EducAR's Mi Escritorio, a government education app pre-installed on millions of school laptops nationwide.

Java · J2EE · Spring · Salesforce · Apex · PHP

PROJECTS

● dimeglio.dev: Portfolio & AI RAG Agent

Personal portfolio built with Next.js 16 App Router, Server Components, and MDX, featuring Guillermo, an AI RAG agent that answers questions about my work and background in real-time.

Next.js · TypeScript · Tailwind CSS · shadcn/ui · MDX · Vercel

● Project Batcave: Multi-Agent AI Ecosystem

Sovereign multi-agent system on a \$0/month GCP VM. Full voice-to-voice pipeline (Whisper STT → Claude → ElevenLabs TTS). Batman-themed agents with bidirectional handoffs and domain expertise.

Node.js · Claude · Multi-Agent Architecture · OpenAI Whisper · ElevenLabs · Telegram Bot API · GCP

● ThePaddleGames.com

Full-stack leaderboard platform for Bay Area paddle sports with Strava integration, data-driven gamification, and geo-spatial challenges. 6 GCP microservices via Pub/Sub. 100+ active users. Solo build end-to-end.

React 19 · TypeScript · Node.js · Firestore · GCP Cloud Functions · Pub/Sub · Strava API · Vercel
