LANGUAGES

English (professional) · Spanish (native)

SKILLS

FRONTEND

React, Angular, TypeScript, JavaScript, RxJS, Next.js, React Native / Expo, NgRx, Tailwind CSS, TanStack Query, shadcn/ui

AI ENGINEERING

Claude Agent SDK, Multi-Agent Systems, Agentic Workflows (Claude Code, Codex), MCP, RAG, Evals & Golden Sets, LLM-as-Judge, GenUI, SDUI, Prompt Engineering

ARCHITECTURE

System Design, Microservices, Event-Driven Architecture, Technical Leadership

BACKEND

Node.js, Hono, Fastify, NestJS, Java, Spring Boot, Maven, Kotlin, PostgreSQL, Firestore, REST APIs

CLOUD & DEVOPS

GCP (Cloud Run, Cloud Tasks, Pub/Sub), Azure, Supabase, Docker, Kubernetes, Terraform, GitHub Actions, Cloud Build

EDUCATION

Information Systems Engineer
UTN FRLP · Argentina
2004 – 2009

Systems Analyst
UTN FRLP · Argentina
2004 – 2008

CERTIFICATIONS

Google Certified Associate Cloud Engineer
Google

AI Engineer Agentic Track: Agent & MCP
Udemy · 2026

AI Leader: Generative & Agentic AI

PROFESSIONAL SUMMARY

Full stack engineer with 17 years of experience across Google, Disney, Wells Fargo and AI startups, now focused on AI engineering: agent systems in production, evals that decide what ships, and technical direction other engineers adopt. At Stellarus I designed and built an agent system that works through thousands of security findings and only counts a fix when a later scan confirms it, and I lead the technical side of a team-wide AI program. Outside work I build and run my own products, including a multi-agent system on the Claude Agent SDK and a paddle sports platform live on the App Store.

> *"Pablo did the work to understand the vision for an innovative enterprise product and deliver on time, in a high-pressure environment. Demonstrating strong leadership, he innovated on the technical side and worked across teams to ensure alignment on how AI-driven agentic pipelines coordinated session threads, data sources, and realtime rendering. I have every confidence that Pablo will bring value to any team he is a part of."*
>
> **Sandro Pasquali, Applied AI Leader at rPotential**

WORK EXPERIENCE

Stellarus — 07/2026 – Present

Lead Full Stack Engineer / AI Engineer · Healthcare technology (Blue Shield of California)

- Designed and built, on my own, an agent system (a Codex plugin with ~20 specialized skills) that works 5,000+ Wiz security findings as campaigns: traces each finding to the deployed commit and repo, fixes it in an isolated git worktree, proves every vulnerable path is gone from the packaged artifact, and opens a PR with the proof. 100+ agent-written PRs covering thousands of findings.
- Made scanner evidence the definition of done: a finding closes only when a later scan of the deployed artifact confirms it, not on a Jira status or a merged PR. Status syncs with Jira and reaches leadership through a React/TypeScript dashboard and generated slides.
- Designed the team's AI Task Force and lead it on the technical side. My shared Codex and Copilot plugin proofs of concept became the team's standard for sharing AI tools, and the program now gives every engineer 30% of their time for AI work.
- Build features and maintain Blue Shield of California applications across Angular frontends and Java backends.

Independent — 08/2025 – Present

Founder & Engineer · Own products, built and run end to end

- **Project Batcave:** multi-agent system on the Claude Agent SDK. A Haiku router picks one of three agents, each its own SDK loop with a tool allowlist and per-turn cost cap, on Cloud Run and Cloud Tasks with Supabase. Reached through Telegram voice, an iPhone and Apple Watch app (Expo, SwiftUI) and two web apps.
- Evals as gates: 13 suites (routing, tool choice, faithfulness, cost, workout parsing with golden sets) run on every PR and before every deploy. Claude Code triage and fixer agents investigate bugs and open fix PRs in isolated worktrees for review. 280+ merged PRs.
- **The Paddle Games:** solo product live on the web and the App Store. Strava sync, a data-driven scoring engine and route challenges on seven event-driven GCP services; close to 100 paddlers.
- **dimeglio.dev:** Guillermo, a RAG agent over the whole portfolio (Pinecone) that streams interactive cards and books calls; blog written by a Claude Code plugin pipeline with an independent reviewer agent.

rPotential — 03/2025 – 05/2026

Senior Software Engineer / Tech Lead · Globant

- Architected a Generative UI engine where 2 LLMs (Claude & Gemini) use tool-calling to stream visual components via NDJSON, eliminating all static page templates.
- Built a 40+ component React design system (atomic design, SDUI pattern) consumed across all platforms.
- Implemented an LLM-as-Judge eval framework for non-deterministic AI-generated UIs: 3 validation layers (unit, structural, LLM eval) with pass-rate scoring and CI-gated quality gates.
- Delivered a React + Ink Terminal CLI integrating LLMs with Slack, GitHub & Calendar, meaningfully improving developer efficiency across the team.
- Championed an AI-augmented SDLC using Claude and Copilot, compressing delivery timelines and enabling the team to ship complete full-stack features significantly faster than before.

Udemy · 2026

RxJS 7 & Observables
Udemy · 2026

Google Cloud Studio Innovation
07/2024 – 03/2025

Senior Full Stack Software Engineer · Globant

- Designed the Angular UI for a multimodal AI retail platform showcased at NRF 2025, improving search efficiency by 50% via Google Gemini.
- Integrated Gemini LLM + Vertex AI vector embeddings for personalized outfit recommendations; built a conversational agent on DialogFlow CX.

Angular · TypeScript · RxJS · Gemini · Vertex AI · DialogFlow CX · Protocol Buffers

Google Agile Modeling Studio
01/2023 – 03/2025

Senior Full Stack Software Engineer · Globant

- Built the frontend architecture for 2 internal AI tools (AMS & AIS) with Active Learning workflows increasing model training speed by 40%.
- Developed AIS's LLM-powered concept exploration and data mining interfaces used by Google Research teams inside google3.

Angular · TypeScript · NgRx · RxJS · Protocol Buffers · Bazel

PCCW Global
06/2022 – 01/2023

Microservices Architect / SME · Globant

- Designed the target microservices architecture for a BillingPlatform integration across 150+ countries: service boundaries, API contracts, DDD, and communication patterns.

NestJS · TypeScript · Node.js · Microservices · DDD

Mission Lane
03/2020 – 06/2022

Full Stack Tech Lead · Globant

- Led 5+ offshore engineers through a monolith-to-microservices migration on GCP: React frontend + Kotlin backend with Kubernetes, Terraform, and full observability.
- Designed event-driven architecture via GCP Pub/Sub to decouple payment pipelines, and established sprint cadences and ADRs for a distributed fintech team.

React · TypeScript · Kotlin · GCP · Kubernetes · Docker · Terraform · PostgreSQL · Pub/Sub · Prometheus · ELK

Google Shopping
11/2017 – 03/2020

Frontend Engineer · Globant

- Built the Google Shopping List application inside google3 (Google's internal monorepo), serving millions of daily active users across Search, Assistant, and Google Home.
- Implemented real-time list synchronization across devices using RxJS and gRPC, and built cross-surface components that adapted seamlessly to web, mobile, and voice-first surfaces.
- Engineered to Google's exacting standards for performance, accessibility, and internationalization, working directly with the Google tech lead and UX designers.

Angular · TypeScript · RxJS · gRPC · Protocol Buffers · Bazel

Wells Fargo
08/2016 – 11/2017

Full Stack Engineer · Globant

- Led the frontend modernization of the Store Vision Platform, migrating from jQuery to Angular, improving the daily workflow of thousands of in-branch bankers nationwide.
- Identified and debugged critical IE memory leaks in the Polymer framework during an intermediate migration phase, contributing findings back to the broader engineering community.

Angular · TypeScript · JavaScript · Polymer · Java · Spring

The Walt Disney Studios
08/2014 – 08/2016

Production Support → Full Stack Engineer · Globant

- Owned production support for the O2I secure global asset transfer system, diagnosing live issues where downtime could delay theatrical releases worldwide.
- Transitioned into full stack development, building new features in Java and Angular while leveraging deep production knowledge from owning incident response.
- Monitored high-security asset transfer workflows via Splunk dashboards, performing forensic analysis on production traffic for studio and distribution partners.

Java · Spring Boot · Angular · Oracle DB · Splunk · REST APIs

Walt Disney Parks and Resorts Online

10/2011 – 08/2014

Backend Engineer · Globant

- Developed highly scalable RESTful services (Java, Spring, JPA) powering reservations, ticketing, and in-park kiosk experiences for millions of annual Disney park guests worldwide.
- Built backend services for the reservation and ticketing systems directly powering the guest experience across Disney parks on web, mobile, and in-park surfaces.

Java · Spring · Spring MVC · JPA · Oracle DB · REST APIs

Earlier Career

2009 – 2011

Senior Developer · Accenture & Globant (Argentina)

- Led development at Accenture on enterprise J2EE projects (Iberdrola, Marsh & McLennan) and at Globant on EducAR's Mi Escritorio, a government education app pre-installed on millions of school laptops nationwide.

Java · J2EE · Spring · Salesforce · Apex · PHP

PROJECTS

Project Batcave: Multi-Agent System on the Claude Agent SDK

Three Batman-themed agents for memory, nutrition and CrossFit training, with eval-gated deploys and an agent-driven bug pipeline.

Claude Agent SDK · MCP · Node.js · Cloud Run · Cloud Tasks · Supabase · Expo · SwiftUI · React

The Paddle Games

Leaderboard and challenge platform for Bay Area paddlers, live on the web and the App Store. Solo build end to end.

React 19 · React Native / Expo · TypeScript · Node.js · Firestore · GCP Cloud Functions · Pub/Sub · Strava API

dimeglio.dev and Guillermo

Portfolio with a RAG agent that answers questions about my work and replies with interactive cards.

Next.js · TypeScript · Pinecone · Vercel AI SDK · Sentry · PostHog
